PROFESSIONAL SUMMARY

New-grad software engineer candidate completing a B.S. in Computer Science in December 2026, with hands-on experience building full-stack applications, testing user-facing software, and contributing to team-based development projects. Strong foundation in Java, Python, JavaScript/TypeScript, React, Node.js/Express, SQL, object-oriented programming, data structures and algorithms, REST-style APIs, relational databases, debugging, and technical documentation. Brings practical QA experience, customer-focused communication, and an interest in building reliable, maintainable software.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, C, C++, HTML5, CSS3

Web & Data: React, Node.js, Express, Bootstrap, REST-style APIs, relational databases, SQL queries, responsive UI

Testing & Engineering: JUnit, Mockito, unit testing, mutation testing concepts, debugging, OOP, data structures, algorithms, requirements analysis

Tools & Systems: Git/GitHub, Linux/Shell, Figma, Agile team projects, data communications/networking, distributed systems concepts

EDUCATION

Virginia Commonwealth University — B.S. Computer Science

Expected Dec 2026

GPA: 3.404/4.00 | Coursework: Algorithm Analysis, Advanced Data Structures, Databases, Data Communications/Networking, Software Testing | Dean's List (multiple semesters), Tau Sigma Honor Society

Brightpoint / John Tyler Community College — A.S. Computer Science

May 2024

GPA: 3.855/4.00 | Summa Cum Laude, Dean's List, Foundation Scholarship Recipient

SOFTWARE ENGINEERING PROJECTS

Medicine Management Platform — Java, JavaScript, HTML, CSS, Express/Node.js, SQL

Jan 2025 – May 2025

- Collaborated on a full-stack application supporting doctor and patient workflows for medication adherence, concern reporting, profile management, authentication, and calendar interactions.
- Implemented dynamic server behavior and front-end/back-end communication for role-based workflows; tested, debugged, and documented login, profile, and calendar functionality.

Blockchain Anonymization / Voting Reliability Capstone — TypeScript, JavaScript, Python

Aug 2025 – May 2026

- Researched and built components for a privacy-preserving voting system using zero-knowledge proof concepts, MACI framework concepts, and Byzantine Fault Tolerance reliability goals.
- Created web-based administrative control and ledger-viewing workflows while documenting architecture, data-integrity, accessibility, and reliability considerations.

E-Commerce Website — HTML, CSS, JavaScript, React, Bootstrap, Figma

Jan 2026 – May 2026

- Designed responsive interfaces from Figma wireframes and implemented interactive front-end functionality focused on navigation, usability, and user feedback.
- Translated simulated user pain points into page-flow and interface improvements and documented design decisions for a consumer-facing web experience.

TECHNICAL EXPERIENCE

Independent Local Business Web Development Initiative

Aug 2026 – Present

- Engage local restaurants, shops, and markets to identify website needs, gather requirements, and propose practical improvements to content, layout, responsiveness, and usability.
- Create and refine web concepts using Figma, HTML, CSS, JavaScript, React, and Bootstrap with attention to maintainability and business goals.

Volunteer Quality Assurance Tester — Closed Beta Programs

Apr 2025 – Present

- Evaluate unreleased and beta software for functionality, UI/UX behavior, stability, workflows, and product quality while following confidentiality requirements.
- Identify and document bugs, usability issues, interface inconsistencies, and performance concerns using structured reports, reproduction context, and video evidence when appropriate.

Software Testing Coursework — Java, JUnit, Mockito

2026

- Designed Java test cases using coverage criteria, mocking, mutation-testing analysis, boundary-focused testing, and defect-oriented debugging.

ADDITIONAL EXPERIENCE

Cooper's Hawk Winery & Restaurants — Waiter, Food Runner, Event Server

Nov 2019 – Mar 2026

- Built trusted customer relationships through clear communication, product recommendations, sales, payment accuracy, and problem solving in high-volume service.

Firefly Lane — Manager

Mar 2015 – Feb 2019

- Managed daily operations, inventory, customer service, staff priorities, and hiring participation while maintaining organized follow-through.
